

# Franck Mekoulou

## Junior Front End Developer

Yaoundé, CM • +237-651-67-99-11 • [log.franckmekoulou@outlook.com](mailto:log.franckmekoulou@outlook.com) • [linkedin.com/in/franckmekoulou](https://linkedin.com/in/franckmekoulou)

Passionate, creative developer specializing in web and mobile technologies. Experienced in designing and building projects using HTML, CSS, JavaScript, TypeScript as well as the React, VueJs, Sveltes and Flutter frameworks. Back-end development experience with Firebase and MongoDB. Proficiency in Dart and C++. Able to conceptualize innovative solutions, solve complex problems and work effectively in a team. Demonstrated commitment to staying current with the latest trends and technological advances.

## TECHNICAL SKILLS

---

- **Programming languages:** Advanced HTML, CSS, TypeScript (JavaScript)
- **Front-End Frameworks:** In-depth experience with React to create responsive, interactive user interfaces.
- **Mobile Development:** Solid Skills in mobile development using Flutter and complete mastery of the Dart Language.
- **Back-End Development:** Practical knowledge of back-end concepts and development with Firebase, MongoDB, and PostgreSQL.
- **Additional Programming Languages:** Mastering the advances of C++ for low-level development and problem solving.
- **Development Tools:** Experience with Visual Studio, Visual Studio Code, Android Studio
- **Methodologies:** Familiarity with Agile development methods and mastery of Git for version control.
- **Data communication:** Experience in working with GraphQL for efficient queries and mastery of REST APIs

## PERSONAL PROJECTS

---

### ❖ Collaborative Project Management – React

A complete web app for team project management. Use of React to develop a modern, intuitive user interface. Integration of Firebase for user authentication, storage of project and task data, and real-time management of updates. Implementation of a comments and notifications system to facilitate collaboration between team members.

### ❖ Invoice Design Application – Flutter

Development of a cross-platform mobile invoice design app. Use of Flutter to ensure a smooth user experience on iOS and Android platforms. Integration of Riverpod and GetX to manage the global state of the application and Firebase to synchronize tasks between devices and enable connection with use account.

### ❖ Airbnb Project Improve – React

Development of the Airbnb Project with a modern UI Design. Fluid user interface powered by REST APIs using React state management inspired from dribbble UI Project.

## EDUCATION

---

### Nkolbisson Bilingual Technical High School

Bachelor's degree in computing
